DebiCheck
Mandate and Instalment Reporting
Specifications Document
DRAFT

Version Number	Date	Modified By	Nature of Amendment
V1.0	2019/09/10	Brandon Velloo	Initial Draft
V1.1	2019/10/14	Brandon Velloo	Update to Reporting Filter Types and Values
V1.2	2020/03/19	Gontse Chauke	Add Cancelled Report type to Instalment report
V1.3	2020/07/08	Brandon Velloo	Addition of Employer Code to Output Fields
V1.4	2020/10/07	Anastacia Mongale	Addition of Original Instalment to Output Fields
V1.5	2020/11/19	Brandon Velloo	Addition of Insurance Fields
V1.7	2021/06/08	Morne Grunig	Added report type 07. Updated report filters
V2	2022/03/08	Danielle Haylett	Addition of error code
V2.1	2022/09/03	Morne Grunig	Removing of date_updated linked to perpetual mandates
V2.2	2022/11/11	Danielle Haylett	Mandate Status Grouping Update
V2.3	2024/08/01	Danielle Haylett	Addition of Original Instalment amount and TPF amount
V2.4	2025/08/04	Danielle Haylett	'authType' column addition to Instalment Report

Contents

Version 2.4

1. Disclaimer

The DebiCheck payment stream is still under development, thus this document is subject to change and it is not the final draft.

2. Introduction

DebiCheck full function reporting includes reporting on mandates and collections.

This document details the following DebiCheck webservice reporting methods:

- getMandateReport
- getInstalmentReport

2.1. System Overview

The merchant will be sending a request type to NuPay via webservices. NuPay needs to accept the request and authenticate the merchant using the authentication string. Once authentication has taken place the data sent through will be processed. All requests are handled by the below mentioned methods of the webservice.

2.2. Security

Security measures include the use of Secure Sockets Layer (SSL) for the connection. It is required to use https instead of the normal http when connecting to the server.

2.3. Best Practice for Webservice Consumption

The webservices adhere to the Restful standard, which dictates that the input and output is Json data. RESTful web services are built to work best on the web.

Representational State Transfer (REST) is an architectural style that specifies constraints, such as the uniform interface, that if applied to a web service induce desirable properties, such as performance, scalability, and modifiability, that enable services to work best on the web.

The suggested method of using this web service is to supply a JSON call with all the input parameters.

3. Connections

3.1. GetMandateReport

URL: https://btm.nupay.co.za/wsDebiCheck/report/mandate_report

3.2. GetInstalmentReport

URL: https://btm.nupay.co.za/wsDebiCheck/report/instalment_report

4. Supported Report Types

The following **mandate report types** are supported:

Report type / Filtered by:

- 01 – Future Mandates / Date updated
- 02 – Pending Authorisation Mandates / Date updated
- 03 – Rejected Authorisation Mandates / Date updated
- 04 – Inactive Mandates *(The inactive report consists of the following statuses: Inactive, Cancelled, Completed Mandates) / Date updated*
- 05 – Suspended Mandates / Date updated
- 06 – All Mandates / Date updated
- 07 – Authenticated mandates / Date created

The following **instalment report types** are supported:

Report type / Filtered by

- 01 – Successful Transactions / Create date
- 02 – Failed Transactions / Create date
- 03 – In Tracking Transactions / Create date
- 04 – Disputed Transactions / Create date
- 05 – Future Transactions / Submit date
- 06 – All Instalments / Create date
- 07 – Cancelled Report / Create date

5. System Inputs

5.1. GetMandateReport

The following JSon layout applies:

```
{
        "auth": "",

        "merchantNumber": "",

        "accessLvl": "",

        "username": "",

        "reportType": "",

        "dateFrom": "",

        "dateTo": "",

        "filterType": "",

        "filterValue": "",

        "tokenID": "",

        "blockID": ""

}
```

5.2. GetInstalmentReport

The following JSon layout applies:

```
{
        "auth": "",

        "merchantNumber": "",

        "accessLvl": "",

        "username": "",

        "reportType": "",

        "dateFrom": "",

        "dateTo": "",

        "filterType": "",

        "filterValue": "",

        "tokenID": "",

        "blockID": ""

}
```

5.3. Input Field Descriptions

Data Element	Description	Mandatory (M) or Optional (O)	Data Type and Length
Auth	Username and password in format "username:password" and Base64Encoded	M	String
Merchant number	Card acceptor. Must be zero padded. Must be pre-registered at NuPay.	M	String (15)
Accesslvl	Either M, S, G for merchant, sub-group and group respectively	M	String (1)
Username	Must be pre-registered at NuPay. Based on merchant number.	M	String
Report type	**Mandate report types:** 01 – Future Mandates 02 – Pending Authorisation Mandates 03 – Rejected Authorisation Mandates 04 – Inactive Mandates *(The inactive report consists of the following statuses: Inactive, Cancelled, Completed Mandates)* 05 – Suspended Mandates	M	String (2)

	06 – All Mandates **Instalment report types:** 01 – Successful Transactions 02 – Failed Transactions 03 – In Tracking Transactions 04 – Disputed Transactions 05 – Future Transactions 06 – All Instalments 07 – Cancelled Transactions		
Date from	Date the report must start from (including specified date). Format YYYYMMDD	M	String (8) (10 including dashes)
Date to	Date the report must end (including specified date). Format YYYYMMDD	M	String (8) (10 including dashes)
Filter type	Allowed inputs: "MID": MandateID "CR": Contract Reference "ID": ID Number **- (ONLY applicable for Mandate Report)**	O	String
Filter value	Mandate ID, Contract Reference or ID/Passport Number depending on the Filter Type.	O	String
Token ID	New or existing report, 0 for new report or the given token_id for existing report.	M	String
Block ID	New or existing report, 0 for new report or the given block_id for existing report. Each block caters for a maximum of 1000 records. If there are more than 1000 records in the date range selected, the next thousand records would move into the next / new block ID	M	String

6. System Outputs

6.1. Report Header

The header contains details that pertain to the report, e.g. the merchant number, username, report type, token_id and block_id for use with an existing report request, date and time of request, etc. The token_id will be a unique id that indicates the report number; the block_id indicates the block of records that was returned. Should the number of report entries not exceed the maximum entry limit of the report, the Token_id will be the unique report id and Block_id will be the id of the last block. For example, record limit is 1000, the request returns 2500 records. First block will be first 1000 records with a block_id 3, second 1000 records can be retrieved with block_id 2, and the last 500 records will be block_id 1.

6.1.1. Mandate Report Header Layout

The following JSon layout applies:

```
{
  "mandateReport": {
    "merchantNumber": "",
    "accessLvl": "",
    "reportType": "",
    "dateFrom": "",
    "dateTo": "",
    "dateTimeStamp": "",
    "tokenID": "",
    "blockID": ""
  },
```

6.1.2. Instalment Report Header Layout

```
{
"instalmentReport": {
    "merchantNumber": "",
    "accessLvl": "",
    "reportType": "",
    "dateFrom": "",
    "dateTo": "",
    "dateTimeStamp": "",
    "tokenID": "",
    "blockID": ""
  },
```

6.2. Report Body

The report body contains the actual report details requested. This will be returned in JSon format.

6.2.1. GetMandateReport Details

All the reports (01-06) have the following JSon layout:

```
{
    "instalmentReport": {
        "accessID": "",
        "reportType": "",
        "dateFrom": "",
        "dateTo": "",
        "dateTimeStamp": "",
        "tokenID": "",
        "blockID": ""
    },
    "reportDetails": [
        {
            "tokenID": "",
            "blockID": "",
            "mandateID": "",
            "mandateRequestTransactionID": "",
            "mandateReference": "",
            "contractReference": "",
            "debtorID": "",
            "debtorBank": "",
            "firstInstalmentDate": "",
            "dateLoaded": "",
            "creditorBank": "",
            "instalmentAmount": "",
            "actionDate": "",
            "cycleDate": "",
            "clientReference": "",
            "status": "Success",
            "statusDescription": "",
            "dateCreated": "",
            "instalment": "",
            "totalInstalments": "",
            "disputable": "",
            "employerCode": "",
            "trackingIndicator": "",
            "originalInstalment": "",
            "mandateStatusGrouping": ""

        },
```

6.2.2. GetInstalmentReport Details

All the reports (01-07) have the following JSon layout:

```
"reportDetails": [

    {

      "tokenID": "",

      "blockID": "",

      "mandateRequestTransactionID": "",

      "mandateReference": "",

      "contractReference": "",

      "debtorBank": "",

      "firstInstalmentDate": "",

      "dateLoaded": "",

      "creditorBank": "",

      "instalmentAmount": "",

      "actionDate": "",

      "cycleDate": "",

      "clientReference": "",

      "status": "",

      "statusDescription": "",

      "dateCreated": "",

      "instalment": "",

      "totalInstalments": "",

      "disputable": "",

      "employerCode": ""

      "trackingIndicator": "",

      "authType": "",

      "originalInstalment": "",

        "insuranceAmount": "",

        "insuranceModel": "",
```

"insuranceName": ",

"originalInstalmentAmount": ",

"tpfAmount": "

},

6.3. Output Field Descriptions

Data Element	Description	Data Type and Length
Mandate ID	Unique number per record issued by NuPay	String
Mandate Request Transaction ID	Unique number used to identify each request to the bank.	String(23)
Mandate Reference	Unique number per mandate issued by Creditor bank	String
Contract Reference	Unique contract reference for the mandate.	String
Debtor ID	Consumer ID number	String (13)
Debtor bank	Banking institution of debtor	String
First instalment date	Date of first instalment	String
Date loaded	Date the contract was loaded	String
Creditor bank	Banking institution of creditor	String
Instalment	Instalment number	String
Instalments	Number of instalments	String
Tracking	Tracking days 01-10 corresponding to 1-10 days	String (2)
Frequency	See appendix 7.2.	String
Collection day	See appendix 7.3.	String
Instalment amount	Amount of instalment.	String
Max collection amount	Maximum amount that can be collected for an instalment.	String
Entry code	See appendix 7.4.	String
Start date	Start date of the mandate.	String
First collection date	The date of the first instalment.	String
Client reference	User defined field	String
Debtor ID	ID number of debtor	String
Debtor account number	Account number of debtor	String
Debtor account type	1 – current account 2 – Savings account 3 – Transmission account	String (1)
Debtor branch code	Branch code of debtor bank account	String
Mandate reference	Mandate reference number	String
Mandate request transaction ID	Mandate request transaction ID	String
Action date	Date when the transaction will be presented at the bank.	String
Cycle date	Original submit date loaded with initiation	String
Status	Successful, Failed, In Tracking, Disputed and Pending (Future)	String
Date created	Creation date	String
Total instalments	Total number of instalments	String
Disputable	Yes or no	String

Employer code	User defined field where employer code was captured.	String
Tracking indicator	Days tracking for the mandate or instalment	String
Original Instalment	Must indicate if the instalment was part of the original mandate by using 'Yes' or 'No'.	String
Insurance amount	The insurance amount in Rands	String
Insurance model	The configured insurance model selected in original mandate initiation	String
Insurance name	The corresponding insurance name of the insurance model selected in mandate initiation	String
Original Instalment Amount	This is the instalment amount minus the TPF amount	String
Auth Type	This field will indicate what authentication type the mandate was loaded as. (TT1 / TT2 / TT3 and RM)	String
TPF Amount	This is the TPF amount	String
Mandate Status Grouping	Indicates specific Grouping that mandate status belongs to. See Appendix 7.4	String

7. Appendix

7.1. Internal Error Codes

Error code	Description
500000	Success
500002	Failed
500003	Invalid ID Number.
500004	Invalid Access ID/ Mandate ID.
500006	Internal Web Service Error
500007	Internal Error.
500012	Card Acceptor not matched
500013	One or more fields is mandatory or invalid
500014	ContractRef needs to be unique
500015	Invalid amount format.
500016	Debtor phone number format.
500017	Debtor email address format.
500018	Mandate not found.
500019	Invalid amendmend reason
500020	Invalid cancellation reason
500021	No records to extract to file
500022	Invalid log type for batch file logging
500023	Filename already exists in log
500024	Filename not found in log
500025	Invalid file length
500026	Invalid file type
500027	MQ Client Unable to connect to server
500028	MQ Client Timed Out No
500030	MQ Client I/O Error
500031	MQ Client Empty/Null String

500032	No Response Received
500033	CAPI Internal Server Error
500034	CAPI Gateway Timeout Error
500039	Mandate not found
500040	Change not applied
500041	Invalid mandate_id format when attempting maintenance
500042	Change not allowed on First Collection
500043	Invalid installment date ,must be future date
500044	Installment added to mandate
500045	Response file empty
500046	Invalid amount of records in response file
500047	Cancelled by Merchant
500048	Incorrect status on instalment
500049	Incorrect status on mandate
500050	Mandate request Expired
500051	Invalid Date Format, Date needs to be in the format "yyyy-MM-dd"
500052	Date Range exceeds 6 months, please select new date range.
500053	Auth Token Error
500054	No Data For Disputed Reports.
500055	Parse Exception
500056	Token Invalid.
500057	User Credentials not linked to merchant. Please use different credentials.
500058	Authentication Failed: User Currently Blocked.
500059	Authentication Failed: Too many failed attempts; User Blocked.
500060	Authentication Failed: No User found or Incorrect Details.
500061	Authentication Failed: Please insert ":" between user and password before encoding.
500062	Authentication Failed. No Token was created.
500063	Authentication Failed.
500064	Auth cannot be null or empty.
500065	Unable to change contract reference. New mandate required
500066	Invalid account number
500067	Invalid branch code
500068	Invalid date
500069	Invalid amount
500070	Invalid account_type
500071	Invalid tracking
500072	Invalid debit sequence type
500073	Invalid entry class
500074	Internal Nupay housed mandate
500075	Invalid Filter Type.
500076	No record inserted

500077	Invalid Filter Value.
500078	Merchant unable to load an Inactive Mandate.
500079	Mandate already Active
500080	Start Date cannot be in the past.
500081	Invalid merchant number
500082	Collection amount limit exceeded
500083	System Error
500084	No Response from Bank
500085	Invalid_tracking on weekly frequency
500086	No Response From Finbond Webservice
500087	No change applied. Old and new values the same.
500088	Start date must be in the future
500089	Invalid Number Of Instalments. Maximum Instalments is 9999.
500090	Employer Code may not contain Special Characters
500123	No Records Found

7.2   External error codes

Error_code	Description
900000	Transaction Successful - Successful Debit or Mandate Accepted
900002	Insufficient Funds - The account does not have sufficient funds available to process the transaction. (Unsuccessful Debit)
900003	Debits not allowed to this account - The type of account does not allow debit transactions.
900004	Payment stopped by Account Holder - Prior to presentment
900005	Dormant Account - The account has been inactive for a period and no debits are allowed to this account.
900006	Account frozen - There is a restriction on the account e.g. card stolen
900008	Account In Liquidation - The account holder has been placed under liquidation. No transactions allowed.
900010	Account in sequestration - The account holder has been placed under sequestration. No transactions allowed.
900012	Account closed - The account has been closed by the account holder
900018	Account holder deceased - The account holder has been declared deceased. No transaction allowed.
900022	Account effects not cleared - There are currently insufficient funds available; however there are uncleared funds on the account that will become available once cleared. This response may optionally be utilised instead of 02 after tracking has completed
900026	No such account - The account number supplied is not found on the issuers system where the collection is taking place.
900040	Item Limit Exceeded
900044	The Debtor Bank is currently unable to process due to a system problem and has issued the 44 response as notification of a problem. Creditor Bank to take no action
900048	Debtor Account Number Fails CDV Routine

900056	Not FICA compliant - Transactions may not be processed to the account as FICA requirements is outstanding.
900099	Held for representment - Currently insufficient funds
901000	Message Identifier MsgId is missing
901001	BIC code in Message Identifier invalid
901002	Generation number in Message Identifier invalid
901003	Sequence number not 000000001
901004	Sequence number is not continuous
901005	Message Identifier is not unique
901006	Creation date and time missing
901007	Creation date and time in Group Header invalid
901008	Number of transactions in header not numeric
901009	Number of transactions invalid at group level
901010	Control sum is not numeric
901011	Control sum is not equal to sum of transactions
901012	Total interbank settlement amount is not numeric
901013	Total interbank settlement amount does not equal sum of the transactions
901014	Interbank settlement date is spaces
901015	Interbank settlement date is invalid
901016	Clearing System identifier invalid
901017	Instructing agent BIC code invalid
901018	Invalid Payment Identifier Structure
901019	BIC code in payment identification is invalid
901020	BIC code in payment identification does not match Instructing agent
901021	Settlement date is not a valid date
901022	Settlement date invalid for Credit Transfer service
901023	Payment identifier transaction sequence number invalid
901024	Duplicate payment transaction identifier
901025	Payment Type Information
901026	Service Level is invalid
901027	Category Purpose Code is invalid
901028	Interbank Settlement Amount is zero
901029	Currency code on transactions differ from that on the group header
901030	Interbank Settlement Date is supplied in Group header and transactions
901031	The number of fractional digits (or minor unit of currency) must comply with ISO
901032	Exchange rate is not permitted unless instructed amount is supplied
901033	Incorrect charge bearer content
901034	Ultimate debtor name is same as debtor name
901035	Debtor Name field is spaces
901036	Debit account is missing
901037	Debit agent is missing
901038	Creditor Name field is spaces
901039	Ultimate Creditor Name is same as Creditor Name
901040	Creditor account is missing
901041	The country code is invalid in regulatory details
901042	The regulatory reporting transaction code is invalid

901043	Creditor agent is missing
901044	The ACH identifier is incorrect
901045	Invalid Service Code
901046	Group Reason Code invalid
901047	Unable to match group message identifier on payment return
901048	Return identifier must be unique
901049	Return transaction sequence number must be contiguous
901050	Return transaction sequence number must start at one daily
901051	Invalid End-to-End Transaction identifier
901052	Original Payment Identifier not matched
901053	Returned interbank settlement amount not equal to original amount
901054	Invalid Transaction Reason code
901055	Settlement method is invalid
901056	Duplicate credit transfer
901057	Cancellation did not match original payment at ACH
901058	Duplicate credit return
901059	Resolution of investigation not matched to original cancellation request
901060	Invalid Tracking Code
901061	Invalid Instalment Sequence
901062	Invalid Entry Class
901063	Interbank settlement amount currencies differ
901064	Incorrect Requested Collection Date
901065	The Contact Details for the Creditor are missing
901066	The Creditor Account Number is invalid
901067	The Creditor Branch Code or BIC Code is invalid
901068	The Debtor Account Type is invalid
901069	The Debtor Branch or BIC is invalid
901070	Invalid Debit Sequence Type
901072	The First Collection Date is not in the future
901073	The last collection date is not in the future
901075	Payment Orig Bic Invalid
901076	Payment Dest Bic Invalid
901077	Creditor account is invalid
901078	Instructing Agent is invalid
901079	Instructed Agent is invalid
901080	Original message type invalid
901081	Invalid Status Group Code
901082	Invalid Reason Code
901083	Invalid Creditor Contact Details
901084	Invalid Debit Value Type
901085	Initiating party may not be spaces
901086	Invalid Mandate Reason Code
901087	Invalid Accept Indicator
901088	Mandate Request Type is invalid
901089	Transaction Id not matched to original Transaction id
901090	Ultimate Creditor Name may not be spaces

901091	Ultimate Debtor Name may not be spaces
901092	Mandate Reference Number may not be blank or spaces
901093	Contract reference not matched to original
901094	Invalid Instructed Amount on Mandate Suspension
901095	Mandate acceptance out of sequence.
901100	Tracking Indicator invalid
901101	Invalid authorisation Code
901102	Invalid Instalment Occurrence
901103	Invalid Instalment Frequency
901104	Invalid Mandate Initiation Date on mandate
901105	Invalid TO date on mandate
901106	Invalid First Collection Date on mandate
901107	Invalid Final Collection Date
901108	Invalid Instalment Amount on mandate
901109	Invalid Initial Amount on mandate
901110	Invalid Final Collection Amount on mandate
901111	Instalment amount is greater than the Maximum Collection Amount
901112	Invalid Threshold Amount on mandate
901113	Invalid Creditor Agent on mandate
901114	Invalid Creditor Account on mandate
901115	Invalid Debtor Account Number on mandate
901116	Invalid Debtor Agent on mandate
901117	Invalid Authentication Indicator on mandate
901118	Invalid Authentication Type on mandate
901119	Invalid Debit Value Type on mandate
901120	Invalid Collection Day on mandate
901121	Invalid Date Adjustment Rule Indicator on mandate
901122	Invalid Debtor identifier on mandate
901123	Debtor Account Number fails CDV
901124	Mandate Reference Number is blank or spaces
901125	Invalid Adjustment Frequency on mandate
901126	Invalid Adjustment Rate on mandate
901127	Invalid Adjustment Amount on mandate
901128	Invalid Creditor Name on mandate
901129	Invalid Ultimate Creditor on mandate
901130	Invalid Ultimate Debtor on mandate
901131	Invalid Contract Reference on mandate
901132	First Collection Date on mandate may not be amended to an earlier date
901133	First Collection Date on mandate must be 3 day greater than load date.
901134	Invalid Initiating Party
901135	Tracking Cancellation Indicator Invalid
901136	Mandate Requested Identifier not found
901137	First Collection Date on mandate may not be amended to an earlier date
901138	Mandate amendment not matched
901139	Mandate amendment date invalid
901140	Mandate is not in a status to be amended

901141	Mandate amendment date error
901142	Mandate amendment failed due to collection response outstanding
901143	Mandate Cancellation Reason Code is invalid
901144	Original Mandate Request Identification is not matched
